## Medical Implants

Astrolabe recognizes that proper surgical procedures and techniques are responsibilities of medical professionals.

The following guidelines are provided for information purposes only. Each surgeon must evaluate the appropriateness of the procedures based on their medical training, experience and condition of the patient. Before using the system, the surgeon must consult the operating instructions for additional warnings, precautions, indications, contraindications and adverse effects.

## COMBO HAND SYSTEM 1.2/1.7/2.3 mm

## Features

- Astrolabe Combo Hand is a modular system, differentiated by color, referring to the diameter of screws, which facilitates and makes easier the choice of the most appropriated implant to the most varied demands of hand surgery.
- The low profile of the plates minimizes tissue irritation.
- Plates design that allows the use of Locking Screws and/or Non-Locking Screws

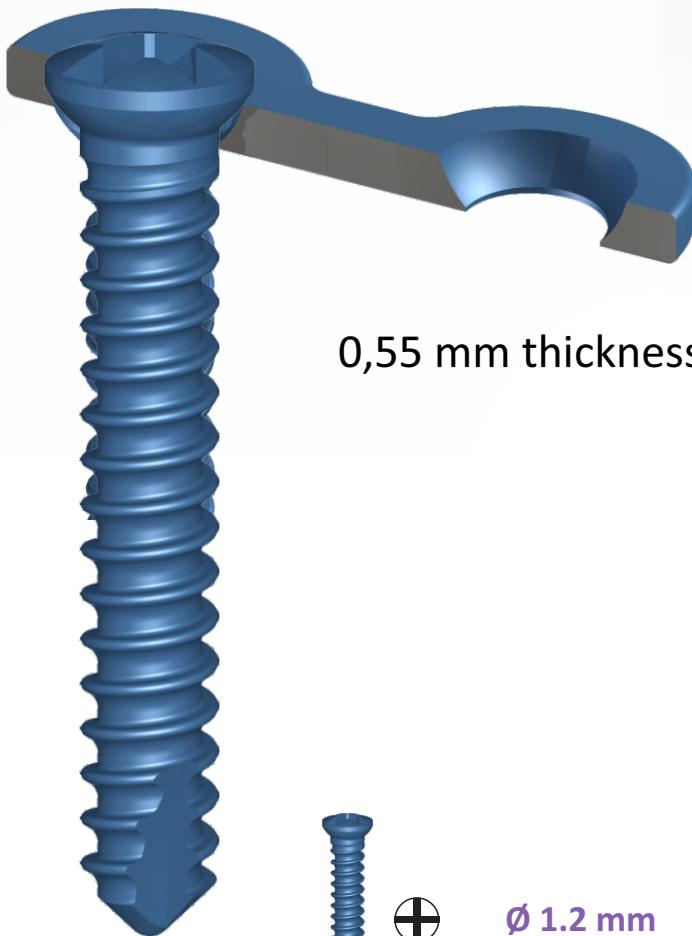

### Indications:

- Handsurgery
- Traumatology
- Reconstructive surgery
- Plastic surgery

## Surgical Technique

- After choosing the appropriate plate, if necessary, it can be moulded (item 17/ 18) to better fit the patient's anatomy.
- Position the plate over the fracture or osteotomy and provisionally fix it with a Kirschner Wire.

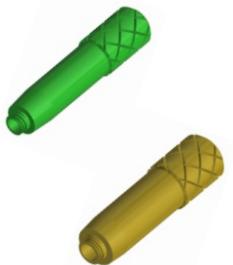

- 1.2mm/ 1.7mm/ 2.3mm Cortical Screws:** Use the Combo Hand System color code and select the appropriate Drill Guide Insert (item 20/ 21/ 22/ 23/ 24) properly coupled with the Drill Guide Handle (item 06) then proceed with drilling using the Drill Bit (item 01/02/03).

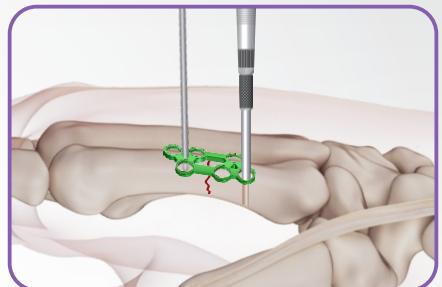

**NOTE:** If it is necessary to deepen a little more the drilling, when using 2.3mm plates and screws (yellow), is recommended the use of the Drill Guide Insert, for Drill Bit/wire Ø up to 2.5 mm (item 23) because it has no "stop" at its tip.

- 1.7mm/ 2.3mm Locking Screws:** It is mandatory the use of Threaded Drill Guide ( item 25/ 26) to perform a perpendicular drilling and a perfect fit of the Locking Screws over the plate.
- Use the Combo Hand System color code and select the appropriate Threaded Drill Guide and Drill Bit then proceed with drilling.

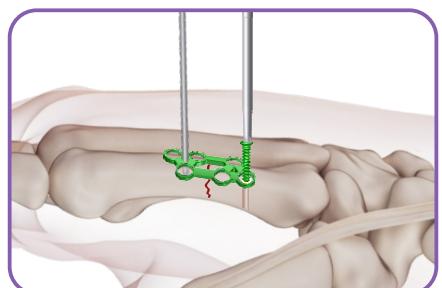

## *Surgical Technique*

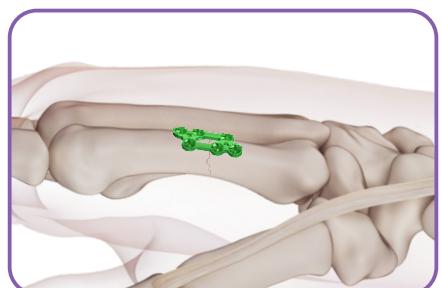

- The screw measure can be obtained by reading on the Depth Gauge (item 13/ 14).

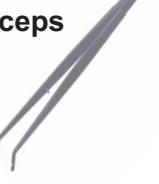

- Use the Combo Hand System color code and select the appropriate Handle ( item 04/ 05) and Shaft Screwdriver ( item 10/ 11/ 12) to position the screws.

- Proceed with x-ray to check if final position is according to initial intention.
